Secure partitions and space solutions for more safety distance in you salon.

Séparateurs sûrs et solutions d'espace pour gardez la distance de sécurité dans votre salon.

Solutions to separate spaces inside the salon

Due to the situation generated by Covid-19, PAHI Barcelona offers some options to separate the different spaces inside the salon in order to maintain the recommended safety distance.

Here below we show you partitions manufactured in safety glass of 6mm with a laminated base (to choose within our finishes). The options suggested are based on the different areas of the salon: cutting area, wash units, reception and manicure area.

We are proposing the use of glass instead of other existing plastics in the market since it offers some important advantages:

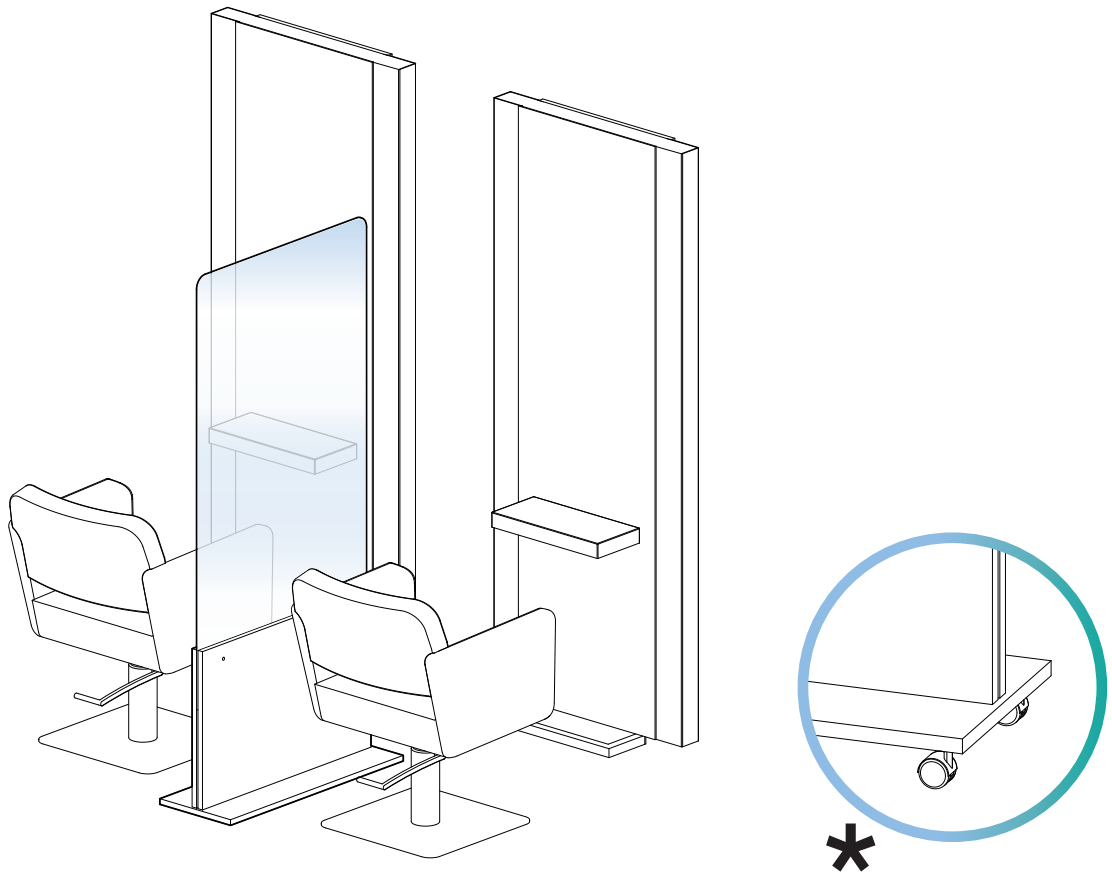

Durability
Easy cleaning and disinfection
Recyclable and ecologic
Very tough to avoid scratches
To avoid static electricity wich catches the hair.

Solutions pour séparer les espaces de le salon

Dans le cadre de la gestion de le COVID-19, Pahi propose un ensemble de séparateurs pour chaque espace de le salon et de cette façon faire respecter les distances de sécurité conseillés.

Ensuite, nous présentons les séparateurs fabriqués en verre clair de sécurité et avec la base de stratifié (à choisir entre toutes les notes finitions). Les options proposés sont pour les quatre zones principales de le salon: zone de coupe, zone bacs, zone accueil et zone manucure. Nous recommandons l'utilisation de le verre au lieu des autres matériaux pour les importants avantages suivantes:

Durabilité
Nettoyage et désinfection faciles
Matière recyclable
Resistant aux rayures
Éviter l'électricité statique et son effet sur le coupe

Ref: C0088, C0088R (wheels version)

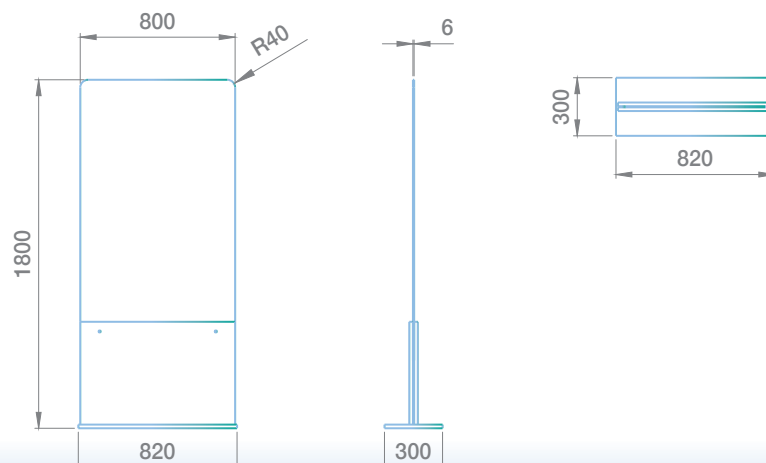

Cutting Area zone de coupe

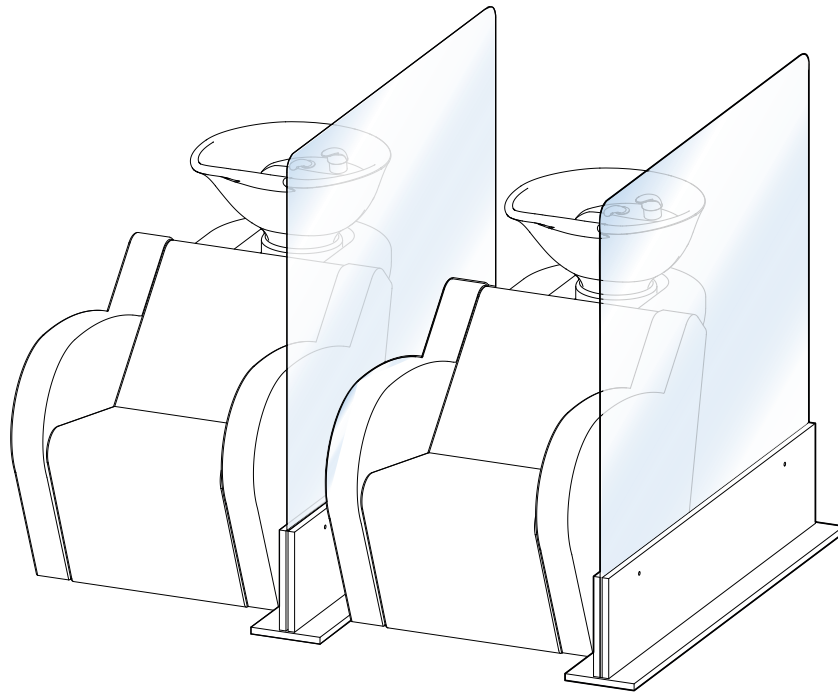

Partition to be placed between existing styling units and chairs. *Castors can be attached optionally.

*Séparateur pour chaque coiffeuse. *Option roulettes sur la base.*

Dimensions /Dimensions

(mm)

Ref: C0089
